

# 50 Things To Go Further With Google Classroom

Google Classroom is a free online learning platform that makes it easy for teachers and students to communicate and collaborate. With Google Classroom, teachers can create and assign assignments, communicate with students, and track student progress. Students can submit assignments, participate in discussions, and access course materials. Google Classroom is a great tool for online learning, and there are many things that teachers and students can do to get the most out of it. Here are 50 things to go further with Google Classroom:

Google Classroom makes it easy to create and assign assignments. Teachers can create assignments from scratch, or they can import assignments from other sources, such as Google Drive or YouTube. Assignments can include text, images, videos, and links. Teachers can also assign due dates and point values for assignments.

Google Classroom is a great way for teachers to communicate with students. Teachers can post announcements, send messages to individual students or groups of students, and start discussions. Students can also communicate with teachers and classmates through the Google Classroom stream.

Google Classroom makes it easy for teachers to track student progress. Teachers can view student grades for assignments, see when students have completed assignments, and track student participation in discussions.

Google Classroom makes it easy for teachers to provide feedback to students. Teachers can comment on student work, grade assignments, and start discussions with students about their work.

Google Classroom makes it easy for teachers to collaborate with other teachers. Teachers can add other teachers as co-teachers to a class, and they can share assignments, materials, and announcements with other teachers.

There are many Google Classroom extensions that can help teachers and students get the most out of the platform. Some popular extensions include:

- **Classkick:** Classkick is an interactive whiteboard that allows teachers to draw, write, and annotate documents in real-time with students.
- **Pear Deck:** Pear Deck is an interactive presentation tool that allows teachers to create and share presentations with students. Students

can respond to questions and polls, and they can draw and annotate slides in real-time.

- **Nearpod:** Nearpod is an interactive lesson platform that allows teachers to create and share lessons with students. Lessons can include videos, quizzes, and polls.
- **Edpuzzle:** Edpuzzle is a video editing tool that allows teachers to add questions and activities to videos. Students can watch videos and answer questions at their own pace.

Google Classroom can be used with other Google tools, such as Google Drive, Google Docs, Google Sheets, and Google Slides. This allows teachers and students to create and share documents, spreadsheets, presentations, and other resources with each other.

Google Classroom is available as a mobile app for iOS and Android devices. This allows teachers and students to access Google Classroom on the go.

Teachers can create and manage classes in Google Classroom. Teachers can add students to classes, remove students from classes, and change the settings for a class.

Teachers can add students to classes by email address or by sharing a class code with students. Students can also join classes by clicking on a link to the class.

Teachers can remove students from classes if they are no longer enrolled in the class or if they are not using the platform.

Teachers can change the settings for a class, such as the class name, the class description, and the privacy settings.

Teachers can post announcements to the Google Classroom stream. Announcements can be used to share important information with students, such as upcoming due dates or changes to the schedule.

Teachers can send messages to individual students or groups of students. Messages can be used to answer questions, provide feedback, or share resources.

Teachers can start discussions in the Google Classroom stream. Discussions can be used to generate discussion among students, share ideas, or answer questions.

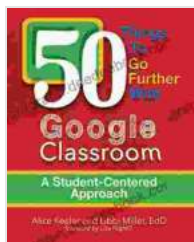

Students can create and submit assignments in Google Classroom. Assignments can be submitted as text, images, videos, or links. Students can also submit assignments through the Google Classroom mobile app.

Teachers can comment on student assignments to provide feedback. Comments can be used to praise students for their work, to provide constructive criticism, or to ask questions.

Teachers can grade assignments in Google Classroom. Grades can be entered as points, percentages, or letter grades.

Students can view their grades for assignments in Google Classroom. Grades can be viewed by assignment or by course.

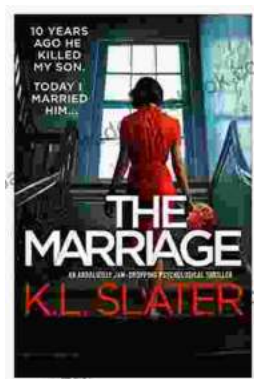

Students can view feedback for assignments in Google Classroom. Feedback can be viewed as comments or as grades.
