

# What the Elite Have Done to America and How to Fix It

The American Dream is dead. For decades, the elite have been rigging the system in their favor, leaving the rest of us behind. They've shipped our jobs overseas, crashed our economy, and destroyed our healthcare system.

But it doesn't have to be this way. We can take back our country and build a better future for ourselves and our children. Here's how:

### 1. End the Fed

The Federal Reserve is a private banking cartel that has been controlling our money supply for over a century. They've created inflation, bailed out Wall Street, and made it impossible for small businesses to compete.

We need to end the Fed and restore control of our money supply to the people. This will allow us to create real economic growth and prosperity for all Americans.

## **2. Break up the banks**

Too big to fail banks are a threat to our economy and our democracy. They've taken reckless risks with our money, and when they've failed, we've had to bail them out.

We need to break up the big banks and restore competition to the financial sector. This will make our economy more stable and protect us from future crises.

## **3. Get corporate money out of politics**

Corporations have too much power in our political system. They use their money to buy elections, lobby for special interests, and rig the rules in their favor.

We need to get corporate money out of politics. This will allow us to create a government that works for the people, not the corporations.

## **4. Invest in education**

Education is the key to opportunity and success. But our education system is failing our children. We need to invest in early childhood education, K-12 education, and higher education.

This will give our children the skills they need to compete in the 21st century economy and build a better future for themselves and our country.

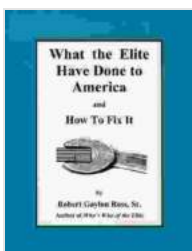

## 5. Protect our environment

Climate change is a serious threat to our planet and our way of life. We need to take action to reduce greenhouse gas emissions and protect our environment.

This will ensure that our children have a healthy planet to live on and that our economy is sustainable for the long term.

We can take back our country and build a better future for ourselves and our children. But we need to act now. We need to end the Fed, break up the banks, get corporate money out of politics, invest in education, and protect our environment.

These are bold ideas, but they are necessary. We can't afford to let the elite continue to destroy our country. We need to take action and build a better future for all Americans.
